

# TRACER Breeder Pack

## Topdress Mineral Premix

**Product Description: Breeder Pack** this formula was designed by the man who wrote the nutritional specifications for the American Embryological Society. Formulated more than 20 years ago as the old Albion Breeder pack this product continues to deliver more high quality embryos from donors at flushing and increasing conception rates of recips and AI programs.

### Feeding Directions:

**Breeder Pack** is a top-dress mineral with no added white mixing salt. Feed so each animal receives 3-4 ounces per head per head per day at least 45 days prior to breeding, flushing or transferring embryos. It is recommended that you also feed a highly fortified free choice mineral along with the **Supreme Breeder Pak**. Cattle with low quality eggs or that may be cystic may require 6 ounces per day for 22 days prior to breeding or day of being flushed. Always provide clean fresh water.
