AMINO ACID CHELATE MINERALS

PRESCRIPTION CHEMISTRY

Chelation of trace minerals is a very precise science. Only an amino acid chelated trace mineral can resist digestion and maintain its integrity as it travels through the digestive system. Amino acid chelates are primarily absorbed in the jejunum area of the small intestine.

Tracer Nutrition utilizes true amino acid chelated minerals which are formed by connecting an amino acid to a mineral, forming an electrically neutral, heterocyclic ring structure that helps avoid interactions with antagonistic minerals such as iron and sulfur. The absorption process of a true amino acid chelate is more efficient and requires less metabolic energy because of its chemical structure.

Subclinical trace element deficiencies have a variety of clinical signs similar to infectious diseases and are very difficult to diagnose.

Tracer Life Balance Dog Tabs helps take the guess work out of your dogs nutrition program.

Trace minerals are the foundation of immunity, reproductive performance and energy utilization in animals. They are the “spark plug” of the engine that triggers enzyme reactions to occur. Just as your engine cannot run without fuel that energy is no good to the engine without the spark that facilitates the reaction.

Probiotics are “yogurt” for the dog. There are several strains of bacteria in Life Balance Dog Tabs that migrate to the small and large intestine to produce several compounds that help combat bad bacteria, aid in intestinal gut integrity and keep the dogs system regular. This helps in immunity as well, which is very important. Research reports that 70% of an animals immunity originates in the gut.

Digestive enzymes aid the stomach in breaking apart foods into smaller fractions so the nutrients may be absorbed in the intestinal tract to provide their nutrition to your dog.

*“You can trace every sickness,
every disease and every ailment to a
mineral deficiency.”*

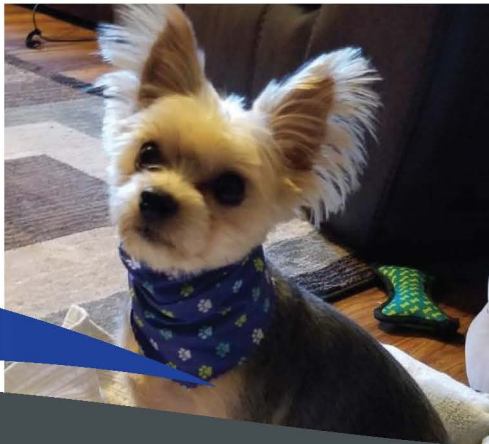

Dr. Linus Pauling, Nobel Prize Winner

TRACER LIFE BALANCE DOG TABS are designed to promote health. When an animal has good health it has better skin with fewer disorders such as dermatitis and hot spots.

TRACER LIFE BALANCE DOG TABS provide the necessary minerals, in the correct ratios to build the most powerful antioxidants in the body. SOD, GpX and Catalase are enzymes manufactured in the body to rid it of free radical oxygen. This helps alleviate joint swelling and pain as well as all of the other negative effects from free radical oxygen.

AREAS OF RESEARCH ON THE EFFECTS OF AMINO ACID CHELATES TRACE MINERALS IN HUMANS & ANIMALS

INGREDIENTS IN TRACER LIFE BALANCE

DOG TABS address the issue of Coprophagia (fecal eating). It is suggested by Veterinarians and Nutritionists that better trace mineral nutrition and the feeding of digestive enzymes will greatly reduce or even stop this activity.

- Depression & Dependency
- Hyper-excitability
- Magnesium and Asthma
- Mineral Nutrition and Allergies
- Antioxidant Defense System and Trace Minerals
- Effects on Inflammation
- Cardiovascular Disorders and Trace Minerals
- Osteoarthritis and Cartilage Breakdown
- Effects on Heart
- Inflammatory Bowel Disease
- Cognitive Function
- Immunity and Healing
- Magnesium and its Effects on Disease and Aging
- Sports Performance / Exercising
- Pregnancy and Nursing
- ROS, Pathology and Antioxidant
- Canine Disc Disease
